Solve the problem below. You have 25 minutes. After you are done, rename the file containing your source code as your student ID (so, if your student ID is 2005001, the name of your file should be 2005001.c). Then submit that file to Moodle. Make sure you submit a file containing the source code.

Failure to not follow these instructions will result in penalties.

Problem 1.

Write a C program that takes two strings \boldsymbol{a} and \boldsymbol{b} as input. Your program verifies whether $\boldsymbol{a} = \boldsymbol{b} \boldsymbol{k}$, for $\boldsymbol{k} > 1$. Print "Yes" if $\boldsymbol{a} = \boldsymbol{b} \boldsymbol{k}$ and "No" otherwise.

Input	Output
abcdabcdabcd abcd	Yes
abcdabcdabcdabc abcd	No
aaaaaa aa	Yes
abczabcabc abc	No
abc abc	Yes

N.B.

- ★ You can use the library function strlen().
- ★ You *can* assume that the provided input will *always* be valid.
