CSE 204 (Data Structures and Algorithms I Sessional)
July 2022 Term
Online Assignments: Binary Heap

Online [B1]: Problem Specification

Implement the `buildHeap` function which converts a given array to a min-heap. This should be in-place, meaning that you have to update the given array instead of creating a new one.

Sample I/O:
Input array:

4	10	8	30	2	3	6	70	25	1

Output array: you have to print it level-wise

1	2	3	25	4	8	6	70	30	10
